DETAILED ACTION

Applicant's arguments filed 12/16/04 have been fully considered but they are not persuasive. See arguments below.

I. Rejection of claims 128,135,136 under 35 USC 102(e) as being anticipated by Kaufman will not be maintained. Independent claim 128 has been amended to include particle size range from 0.1 to 10 Um.

II. Rejection of claims 147,148 under 35 USC 103(a) as being obvious over Kaufman will be maintained for reason on record and reason as follows. Claims 128, 135, and 136 are added to this rejection. Applicant argues that the drug is not administered in the form of an aerosol. Examiner disagrees with Applicant. See Example 3 in instant specification.

III. Double Patenting Rejection

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 128,135-137 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10,14-16 of

Art Unit: 1616

U.S. Patent No. 6419901. Although the conflicting claims are not identical, they are not patentably distinct from each other because instant application encompasses the invention of USPN 6,419,901. USPN '901 discloses a method comprising a vesicant anthracycline anti-cancer agent, which is encompassed, by a vesicant anti-cancer agent disclosed in instant claims.

Claims 128,135-137 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1,2,10-18 of U.S. Patent No. 6,348,209. Although the conflicting claims are not identical, they are not patentably distinct from each other because instant application encompasses the invention of USPN 6,348,209. USPN '209 discloses a method comprising a vesicant vinca anti-cancer agent, which is encompassed, by a vinca anti-cancer agent disclosed in instant claims.

IV. Claims 131,151-155 are objected to. The prior art does not teach or suggest instant method comprising an alkylating anti-cancer agent.
